Software Engineer, currently working in **Dubai**.

Experienced full stack developer with deep hands on knowledge on **Golang, Nodejs** with production level experience in integrating external and internal **API services** using Microservices architecture, practicing **Twelve Factor Application** design and UI frameworks like **React and Angular**, also expert in **Android** application development.

## WORK EXPERIENCE

### **Grape Technology, Dubai**

Jan. 2019 – Present

#### **SOFTWARE ENGINEER**

- Designed and Implemented **API services** for blockchain solution using **Golang**, and **Nodejs** and integrated the system with the front-end.
- Build solid working relationship with internal teams and clients and work closely with quality, product management and technical operations to develop test and deploy high quality software solution.
- Analyze and select tools to be used in the solution to handle high volume data

### **Block Gemini, Dubai**

Jan. 2018 – Jan. 2019

#### **FULLSTACK DEVELOPER**

- Performing requirement analysis, design and technology sourcing, integration of front-end in **Angular2+** with backend **API services**.
- Application development for **Logistic Supply Chain & Crypto wallet**.
- Independently authored a **geolocation data provider**, Job Scheduler for real time location updates from logistic devices.
- Experience with blockchain technology like **Hyperledger Fabric**.

### **Veblabs PVT Ltd, Kerala**

Dec. 2016 – Jun. 2017

#### **SOFTWARE DEVELOPER**

- Back-end **API development** and **Android application** development.
- Created custom frameworks for recruits to use CURD operations.
- Worked with Message Queuing technologies **Apache Kafka**, **RabbitMQ** in Media Entertainment Project reaching wide audience.

### **Centree Technologies, Technopark, Kerala**

May. 2015 – Nov. 2016

#### **DEVELOPER**

- Create and develop the project ideas, **PoC**, **Web Applications** development.
- Created custom CSS framework with **CSS pre-processors (SASS)**.
- Real-time notification and events using **Socket.io**.
- Upgraded existing PHP stack to **MEAN stack** and view rendering using EJS template engine.

## TECHNICAL SKILLS

- **Golang, Nodejs** (MEAN stack), **MySQL, PostgreSQL, Redis, MongoDB**.
- Front-End development using **jQuery, Angular2+**, Material design concepts
- Mobile Application development in Android Java.
- Cloud services **AWS webservices** (also Heroku & Digital Ocean).
- Message Queues like **Kafka, RabbitMQ, go-nats, nats-streaming**.
- Blockchain technology - **Hyperledger Fabric**
- Prefers **Git** versioning, **Ubuntu** and **Docker** machines.

## EDUCATION

### **Anna University**

Jun.2013 – Nov. 2017

#### **BACHELOR OF ENGINEERING**

Computer Science and Engineering.  
Confident in **Data structures** and Concepts
